29 GAUGE ROOFING AND SIDING PANEL "AG" PANEL

- * Also available in 26 gauge.
- * Our most popular residential roof panel.
- * Minimum 3/12 roof pitch required.

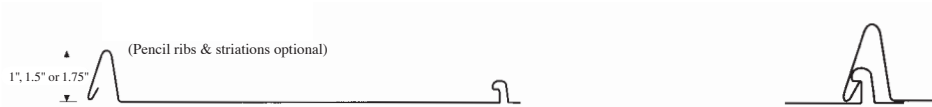

26 GAUGE ROOFING AND SIDING PANEL "PBR" OR "R" PANEL

- * The PBR panel will span up to 5' purlin spacing on roof application.
- * The PBR panel is suitable for roof and sidewall application.
- * The PBR panel has a "Purlin Bearing Rib" as shown below to provide for roof application.
- * The "R" panel is for sidewall application only and does not have a "Purlin Bearing Rib".
- * Minimum 1/12 roof pitch required (3/4" wide butyl tape required in lap on installations less than 3/12 roof pitch).
- * Available in select colors

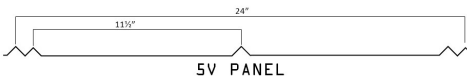

STANDING SEAM / CONCEALED FASTENER ROOF PANEL

- * Standard is 24 gauge.
- * Available in rib heights of 1", 1.5" & 1.75".
- * Standard panel width is 16" using the 1" rib height.
- * Oil-Canning is not a cause for rejection. (Striations or stiffening ribs can reduce this occurrence).
- * Nail strip panel shown, clip system panel available.

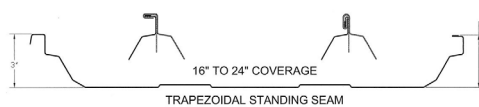

5V PANEL

- * Available in 29 gauge

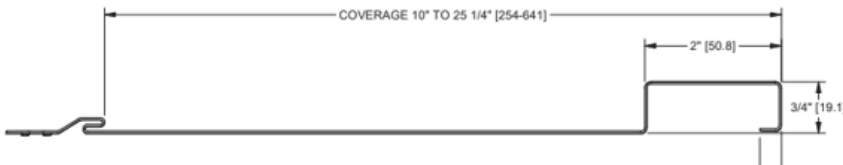

TRAPEZOIDAL STANDING SEAM

- * Available in 24 gauge

BOARD & BATTEN

- * Available in 26 gauge
- * Made for wall panels
